## *S2000 Air Splitter/Protector*

**Year: 2001-2003 with factory bumper**

Thank you for purchasing the TRACK DOG Air Splitter/Protector. The Air Splitter is designed to help protect the factory bumper by allowing the Air Splitter to slide over obstacles, such as steep driveways. The flexible urethane bumper can flex without scratching the factory paint. The Air Splitter is made from 1/8" thick, high-impact ABS plastic and will surprisingly take a lot of abuse. The textured top finish blends in well with any color. Be sure to read the instructions in its entirety before beginning installation.

## Instructions:

1. The Air Splitter easily mounts to the bumper using the factory original hardware and mounting holes. Jack the car up on both sides high enough to have access under the bumper; see picture. Be sure to use jack-stands for protection.

2. The S2000 has mounting bolts attached under the front bumper. Remove all of these bolts using a 10 mm wrench. All of the bolts will be reused in attaching the new Air Splitter. The S2000 has a small lip that the Air Splitter will attach next to. Remember, the textured side faces up. Starting from the ends, attach the factory hardware with a 10 mm wrench. Attach remaining hardware (See picture above).

If you damage the Air Splitter, instead of your bumper, replacements will mount back into the same mounting holes. Cheaper than a new paint job!

We hope you enjoy your new Track Dog Air Splitter. If you have any comments or suggestions, please let us know. You may visit us at [www.trackdogracing.com](http://www.trackdogracing.com) where you will find other unique products.

We appreciate your business,

Gary Shuhart
